

IB CS HL

CONTROL

INTRUDER ALARM

- Motion sensors
- Buzzer
- Involves multiple concepts
- Easy to build
- Real-world application: “anti-thieves”, home protection

DESIGN OVERVIEW

7.1.2

Outline the uses of microprocessors and sensor input in control systems.

7.1.5

Describe the role of feedback in a control system.

PROJECT IMPLEMENTATION

CHART FOR KEY COMPONENT A

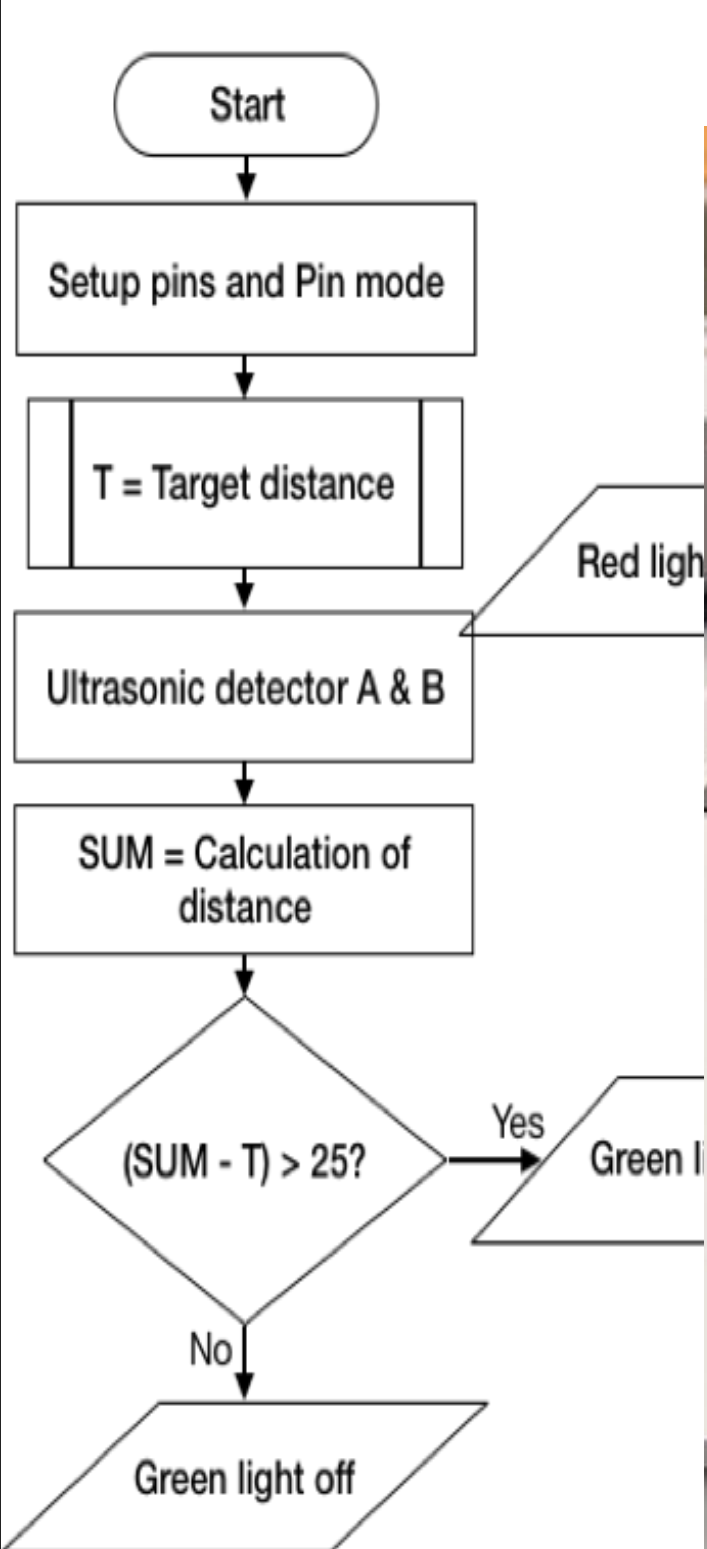

Difficulties & Solution

CHART FOR KEY COMPONENT B

Difficulties & Solution

PRO & CON

- Easily implement, viable solution
- Noise from environment -> not robust
- Insufficient feedback

FUTURE WORK

- Connect to more sensors & better algorithms
- Better sensors
- Connect to phones / laptops / other home control systems

Thanks!
